

DJD-E serial is one of our advanced surveying instruments with large screen. Together with the angle, distance and other measurement modes; the incremental digital angle measurement system can balance the deviation error automatically. It is used in control measurement, engineering measurement, construction and other professional measurement.

## Nitelikler

- New design to achieve better stability
- Large LCD, easy-to-use keyboard
- Time display on the LCD
- Two-sided communication with PC
- Data record capacity: 500 data with time display
- High capacity double batteries
- Indication of user and system errors (7 indications)

## Fields of Application

- Road survey
- Control survey
- Topographic and other engineering survey
- Mine, railroad, HES (hydroelectric power plants), ENH etc. survey
